

1. Title of the certificate (HR) and programme number

Tehničar za računalstvo

(041624)

In the original language.

2. Translated title of the certificate (EN) ⁽¹⁾

Computer Technician

⁽¹⁾ This translation has no legal status.

3. Profile of skills and competences

A) GENERAL EDUCATION COMPETENCES

- Actively use mother tongue and foreign languages by applying language activities and basic communication knowledge and skills in different situations
- Apply basic mathematical knowledge, skills and processes and solve complex mathematical problems
- Comprehend and apply physical principles by applying chemical and biological knowledge within the framework of sustainable community development
- Comprehend geographic processes and fundamental historical knowledge
- Use modern information and communication technology safely and critically
- Have knowledge of basic economic concepts and functioning of the economic system, acquire and apply entrepreneurial competences
- Apply consistently professional ethics and civic education principles
- Foster physical and health culture by exercising regularly in accordance with individual possibilities in order to protect and preserve health

B) VOCATIONAL COMPETENCES

- Design, fabricate and maintain local networks in small businesses and offices, tune network devices, remove configuration errors, interconnect local networks and connect to the Internet
- Design and create simple relational databases, read and entry data in the database
- Diagnose simple problems of the computer systems under operation, install the operating system, the antivirus programs or the basic user software using analysis of security threats and the application of protection methods
- Differentiate between the basic elements of microcomputers and microprocessor structure and their relations and design the block scheme and the diagram of state of the system under operation
- Apply IT technology in business for preparing letters, spreadsheets, presentations and databases and for viewing web sites and for correspondence
- Use and apply the program structures and algorithms in the development of software solutions of a lower complexity degree by means of sequential programming methods and tools, fabricate complex computer programs with graphical interface using object-oriented development tools and programs
- Create and update technical and technological documentation
- Configure complex computer networks based on LAN technology in smaller companies and offices using routers and switches and other network equipment (e.g. DSL)
